Revised Comprehensive Feedback Tracker Entries 2-4
Bitter Lake Playfield Placer AI Usage Report 5-16

Date	Sender-Format	Feedback Provided
First FAQs Pre-4/21		
11-Apr	Shane-Engage	What's the schedule for Court Resurfacing & Details? The miller playfield court is starting to show some decent wear and tear on the courts. When is the plan to resurface it, and it sounds like additional density is being considered for miller playfield as a dedicated pickleball court, which sounds great as there were previous plans proposed to expand it from 4 to 6 pickleball courts there.
Feedback post FAQ #1 (4/21-5-11)		
23-Apr	501PB-Engage	Plan for reservations. Has the plan taken into account the impact not allowing reservations for any public pickleball courts on coaching businesses, non-profits hosting tournaments, the Diversity and Inclusion in Pickleball program, or people wanting to teach a friend how to play? Private courts range $60-90/hour which is cost prohibitive. And most private clubs won't allow coaches to use their space.
11-May	MC-Engage	school use tennis. why in the RSS are there courts with plan to switch to PB when they have current school use tennis? and would be "pending' depending on school use. why not designate those to tennis?
11-May	MC-Engage	how many tennis courts have any "restrictions" to dual use? if any of the city's public courts have been given grant funding, and are restricted to "singular use", how many, which ones. and how many are the city asking for
11-May	MC-Engage	RSS statement re: open play with dual use. RSS document wrote: "we could not easily incorporate open play in our system with dual use for pickleball, therefore dual use is ended", because SPR continues to use the legacy "tennis reservation system" instead of finding a new solution to manage both. pickleball isn't even in the
22-Apr	Jeremy-Engage	Do proposed courts have the capacity for pickleball players given there are already long lines with more courts? This seems like we're headed in the wrong direction. If pickleball player data was used I'm curious what it looks like/where when it was collected. I see hundreds of people playing pickleball at Greenlake West courts every day with long lines. I'm curious how the numbers work out here, hard to believe, even shocking I might say, this was
27-Apr	Kimberly Decker-Engage	Public comment - do not decrease pickleball courts. My 16 year old son and his friends love pickleball - it is such a delightful and diverse population that plays this sport. Shame on anyone supporting efforts to reduce the availability of pickleball courts for the public to enjoy. Alternate courts MUST be in place before any courts are
27-Apr	Dale S-Engage	Why a reduction in Pickleball courts, when tennis courts are fully used? There are far more Pickleball Players than Tennis Players in Seattle. I see tennis courts not being fully utilized, yet pickleball courts are consistently near or at capacity. We all can learn to play with extra lines on the courts too. The lines are even different colors. I use the tennis court lines to help me know where I am on a pickleball court. So why is there a reduction in pickleball courts?
27-Apr	Dale S-Engage	Pickleball is not just Retirees, younger people play too. All ages play pickleball. Retirees mostly in the morning or early afternoon, and those still working come after work. With this severe reduction in courts, all that will stop. Especially if open play is limited to a few courts, instead of a few hours at a lot of courts. Clearly the data collected for the proposal is not quite accurate. Perhaps delaying implementation until better data is collected
30-Apr	Peter K-Engage	It appears you intended to eliminate dual court use in 2024 when you stopped striping pickleball courts, it sure seems you were catering to tennis. if you go to any court that is dual striped you will see that the pickleball strips are far more faded than the tennis court stripes. When the dual striping stopped in 2024, it became obvious that you had this plan to make the change way before you decided to let the public in on this proposal. Are you really
30-Apr	Peter K-Engage	With picklball participatioin increasing in larger numbers than tennis, how can you justify reducing the # of courts by 32? How is that equitable? The largest group of participants in pickleball are retired people. Do you see many people overe 70 playing tennis? No. Abeit you say lost courts will be gained back by 2030. First we all know that is a wish and a prayer, the way city process works. So we, the elderly who play, have fewer years left to be able to participate, and you are taking that away from us.???
24-Apr	filson-Engage	Did SPR look at PlaytimeScheduler.com in assessing court utilization data? Most Seattle pickleball players use PlaytimeScheduler.com to organize & schedule PB play. Does SPR monitior court utilization & demand information available on PlaytimeScheduler? Did SPR consider the real-time and historical data available on
25-Apr	Ron M-Engage	Skewed data. Since you and the general public both know the data that you are using is weighted heavily towards one sport, why don't you step back , reevaluate and come up with a more fair and equitable plan that meets the
26-Apr	DS-Engage	Inaccurate data from Tennis Court Reservation System. It was stated in the April 23rd meeting that data from the tennis court scheduling system was used for the proposal. The majority of pickleball players, estimated at 95% or more, do not use the tennis court scheduling system. Pickleball courts are consistently full while tennis courts are not. Tennis complains of not finding courts. Well, so do pickleball players. Leave the current system in
27-Apr	migueldc-Engage	What reasoning led to "Table 1: Proposed Dedicated Use Change"? The draft says about the proposed dedicated use changes "The racquet sport chosen was informed by the level of existing Seattle school use, pre- and post-dual use demand, and the site's ability to best meet the needs of a particular racquet sport over the other." How did you determine which site best met the needs of a particular racquet sport? What specific data was used to
25-Apr	Ron M-Engage	West Crest Park availability. Has the Parks and Rec considered putting in six dedicated pickleball courts in this empty space there in West Crest Park. It would keep the low lifers out and the noise should not be a problem

27-Apr	migueldc-Engage	The recommendations were developed with community input. The Draft says "The recommendations were developed with community input". Please specify what you mean by that. Who exactly was the "community"? Did the community give its input on the draft itself or on related topics? Whatever happened to the community
27-Apr	migueldc-Engage	Who are the users? How did you etablish their needs? How did you measure equitability? The Draft says the recommendations were developed "to equitably address the needs of court users". Please explain: (1) how you defined who those users are, (2) how you established their needs, and (3) how you assessed the equity of the
27-Apr	migueldc-Engage	What significant background data? The draft says the strategy is "based on significant background data". Please explain what data you are referring to. Please make that data public. Please explain what conclusion you drew
30-Apr	Sandi-Engage	West Seattle Pickleball gets the shaft. I live and play pickleball in West Seattle. It was disgusting that the conversion of some tcourts at Solstice was scrapped. Then the proposed courts at Lowman. Then the courts at Lincoln Park. Why would we believe that pickleball courts will be added any time soon? The ORSS has provided no data collected by actual player counts. The three locations in West Seattle frequently have pickleball players
27-Apr	Amy G-Engage	Public comments registration process. Is there a process to register ahead of time to provide public comments at the 3 in-person meetings? Will additional meetings be added per BPRC commissioner feedback to ensure all
27-Apr	ayabobaya	SPR's Public Involvement Policy for public meeting materials, project budget (amount and sources), metrics. SPR's Public Involvement Policy appears to require public meeting materials to include the project budget, funding sources, and how budget limitations may affect scope. We haven't seen that information for the Draft Outdoor Racquet Sports Strategy. Can SPR please provide it before the remaining public meetings and before
4-May	Peter K-Engage	Why are the in-person engagement meetings not being recorded? The initial FAQ # 7 states that all feedback is recorded and accounted for as part of this engagement process...Public meetings will be used to present the current proposed strategy and hear feedback. Questions received will be logged and an updated FAQ will be posted. So, if the meetigs are not being recorded and no questiions will be allowed, (as I was told) at the in-
23-Apr	Let Us Play-Engage	Were community members and regular users of the courts identified to be removed consulted in a meaningful way? I strongly believe that decisions impacting shared public spaces should be based on clear, transparent data and should reflect the needs of the communities who use them daily. I want to be clear that I am not opposed to tennis or to tennis players having access to courts. I believe both communities should be supported. However, this proposal does not feel balanced or grounded in an accurate reflection of how these particular
24-Apr	Bea-Engage	How much will removing lines cost? How much will the proposed plan cost the city? Any amount to remove courts is a waste of valuable resources given how much SPR and the community spent to install limes, nets,
26-Apr	Ginny M-Engage	What activity meets EVERY GOAL of SPR? Pickleball. How will you show your support to this thriving, active community? Pickleball is inclusive of ALL ages, genders, ethnicity, incomes and physical abilities. It's accessible, social, affordable and builds community! It promotes healthy, active members of your city. Seen playing on courts: parents/grandparents with children, young people (OFF the phones), tournament/league players drilling, Seniors gathering to stay active and socialize. Is it a wonder why we are hooked? Let us play!
27-Apr	migueldc-Engage	What complaints from the community at large are the result of dual-striping? The dual use locations were received well initially, but as more were added, issues arose. The draft says "Complaints received have increased in frequency in line with the increase in the number of dual-striped courts from both racquet sport users and the community at large." In what way is the community at large complaining about dual-striping and
29-Apr	Ginny M-Engage	Did you involve any pickleball players or associations in the development of RSS? It is clear that the tennis community was involved with RSS. That's fine. BUT, was SMPA (Seattle Metro Pickleball Association) contacted? Was USA Pickleball (who has national data), asked to join the table? Was any of the Community Centers asked about the active use of their courts? Was there at least ONE knowledgeable pickleball player present? DELAY
30-Apr	LAC-Engage	Have you considered priority times for each sport and posting rules so players can play at their local courts? Creates community and lowers traffic. Local courts provides opportunity to to exercise, play and create community within walking and biking distance. 60-75% of pickleball players using Gilman Playground courts are local to the area. Under current plan, outside neighborhoods will be inundated will parked cars and street traffic will massively increase. And transit users will be left out due to long rides By establishing and posting rules of
2-May	A11-Engage	Why do you think pickleball uses <50% of dual striped courts? The presentation claims that because the courts are dual-striped, pickleball players are only accessing them about 30% of the time. What is that based on? When I am on the dual-striped courts, they are mostly used by pickleball players. It may be that tennis players are more likely to make reservations but that is not a good measure of who is using the courts.
23-Apr	Craig Montgomery-Engage	Old Magnuson Park courts. Would it be possible to resurface the old outdoor courts at Magnuson Park and give those to pickleball?
24-Apr	Jenna Gordon-Engage	Questions/comments limited to 500 characters. Is there a reason why comments/questions are limited to 500 characters? If these will be used to adjust the proposal why are people being limited to 500 characters and unable to provide detailed comments/questions. I saw in a previous answered question that the meeting will not have a live FAQ and rather a FAQ document will be sent out. Documents let people dodge accountability and enable misrepresentation of questions. Live answers don't...
26-Apr	Wasteoftimeproposal-Engage	This is shortsighted and frankly, dumb! What a waste of time and resources. This will directly impact my neighborhood. No one cares that pickleball and tennis courts are combined. This proposal will sow division.

26-Apr	migueldc-Engage	"To most equitably address the needs, wishes, and issues communicated by the community." The draft document says that the strategy is "developed to most equitably address the needs, wishes, and issues communicated by the community within our existing system and resources." * What were the communication methods that you are referring to? * Were the needs of the community measured in any other ways than by the
26-Apr	migueldc-Engage	Dual-striping main issues: large blocks of reservations. The draft says that one of the main issues with dual-striping is the "Perceived or de facto dedication of a dual use location through large blocks of reservations". Please explain how those reservation issues are specific to dual-striped courts. Please explain how those issues cannot be attributed to the fact that there is more demand for the dual-striped courts than those courts can
26-Apr	migueldc-Engage	Dual-striping issues: refusal to vacate courts for reservations. The draft says that one of the main issues with dual-striping is the "refusal to vacate courts for reservations". Are you saying that pickleball players are not honoring tennis players reservations and that this is one of the main reasons to get rid of dual-used courts? Are you also saying that such problems do not occur on dedicated courts? Please state the frequency of related
26-Apr	migueldc-Engage	Are SPR stated reasons for abandoning dual-use courts valid? The Draft implies that dual-use court users are not following the rules prescribed by SPR. The purported violations include: * having large blocks of reservations * encroaching into adjacent areas which are not rule violations, and * unauthorized dual striping * addition of temporary nets to dedicated tennis courts which have nothing to do with obeying the rules regarding existing
26-Apr	migueldc-Engage	Is SPR inviting more unauthorized dual striping? The draft says that one of the issues with dual striping is that there is "unauthorized dual striping". Unauthorized dual striping is a form of benign civil disobedience. Isn't SPR concerned that by removing official dual striping it will invite more unauthorized dual striping?
26-Apr	migueldc-Engage	This site supports very limited engagement. Why isn't there a way for us to at least "like" an issue brought up by someone else to show we have the same concern? Being able to add to what someone already said would be
26-Apr	migueldc-Engage	Why are large groups encroaching areas adjacent to the courts? The draft says that one of dual-striping main issues is "large groups encroaching into adjacent areas to the courts they are using BETWEEN pickleball and tennis players." Is this an issue inherent to dual-striping or is it due to the fact that SPR is not providing enough
27-Apr	Brittany Johnson-Engage	Removing dual striping hurts Seattle. I live one block from Magnolia’s dual striped courts. Before dual striping, the courts sat empty and abandoned. Tennis players rarely used them. Now they are a vibrant addition to our community. Elderly players play group pickleball every morning. Kids play after school. Families play on weekends. Removing dual striping strips away the fabric of our community and prioritizes people who never
27-Apr	Ian K-Engage	Pickleball is community-building, inclusive, and accessible. Tennis is none of those. Why are we reducing access to pickleball, when it is more inclusive, more accessible, and more community-building than Tennis? Not to mention more popular? here's a community and culture of open-play in Pickleball, similar to pick-up basketball, that simply doesn't exist in Tennis. Tennis courts are used exclusively by people who came with a
30-Apr	Kathy Dunn-Engage	Existing PB Nets/Striping. Parks already invested in moveable PB nets and striping on courts that were converted to dual use. How is it an efficient use of your budget to remove these in June when there is so much demand for them? Leave it alone, you induced the demand, now live with it. Parks should be celebrating increased
2-May	Ginny M-Engage	Delay RSS! Indoor Courts for YOUR Lifelong Pickleball Programs are NOT Open in the Summer! Indoor courts are not available from Mid-June thru September due to important youth programs. Seniors need access to outdoor courts during the summer! Delay RSS! How can SPR continue to advocate for the defeat of ageism? By supporting ALL age ranges who actively use your facilities. The senior pickleball community is a shining example
2-May	Abe Krieger-Engage	Concerned about access and equity. I don’t support Seattle Parks and Recreation taking away recreation opportunities from residents. In particular, the decision to target South Seattle parks feels out of line with the department's equity objectives. Reducing court-use conflict by eliminating access seems deeply inequitable and unfair. I’d like to better understand how the negative impacts on South End residents will be mitigated. And
3-May	melanib-Engage	Kinnear Park court. Hello, I would like to request that the city rethink the use of Kinnear Park court. When I have used the court, I've seen other tennis players there but not pickleball users. More importantly, with the pickleball center on interbay scheduled to open summer 2026, I believe the Queen Anne neighborhood would benefit more from a tennis court at Kinnear Park. Thank you for your consideration.
